

InTra-Net

Innovation in Transnational Networks

Jesper Lund, Project Manager at REG X – The Danish Cluster Academy
65th Polish-German Business Forum
24.10.2012, Szczecin, Poland

AGENDA

1. Objective of the InTra-Net project
2. Background
3. Partners and participants
4. Activities
 - A. Collaboration platform
 - B. Cross-border case studies
 - C. Workshops and networking events
5. Challenges and successes in our project

1. Objective of the InTra-Net project

Innovation in Transnational Networks

The purpose of the InTra-Net project is to strengthen collaboration on innovation and internationalization between clusters in the INTERREG 4A region. The goal is to create three cross-border collaborative project ideas through the InTra-Net project.

The InTra-Net project is a two year project (2011-2012) between the Danish Cluster Academy, [REG X](#), and The Business Development and Technology Transfer Corporation of Schleswig-Holstein, [WTSH](#).

The project is supported by INTERREG 4A Syddanmark-Schleswig-K.E.R.N. with financing (220.000 €) from the European Regional Development Fund.

The INTERREG 4A Region

2. Background

- How can clusters and networks contribute to creating a growth region that cuts across borders?
 - Internationalization of clusters is needed

Today:

- Only sporadic collaboration among cluster actors now
- An unexploited potential for companies and specialised research facilities in the region

→ A need for competence building, experience, knowledge sharing and networking between cluster actors in the INTERREG 4A Region.

3. Partners and participants

Project partners:

REG X

The Danish Cluster Academy

&

WTSH

Wirtschaftsförderung und
Technologietransfer in Schleswig-Holstein

Participants:

20 clusters from the INTERREG 4A Region

Advisory Board:

9 representatives from public sector, research institutions and private sector on both sides of the border

Participating clusters:

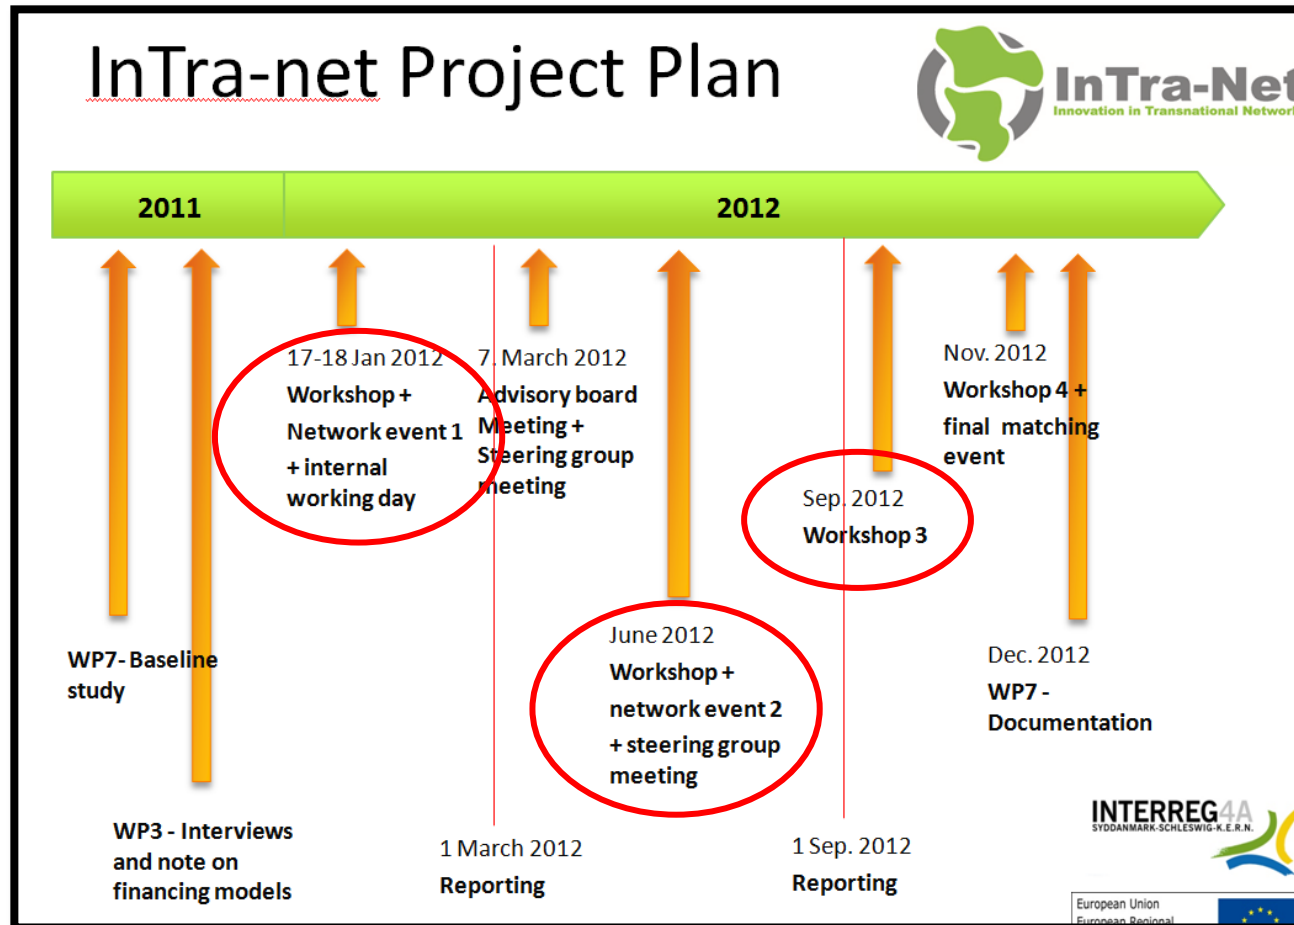

- [AluCluster](#)
- [CEwind Center of Excellence Wind Energy](#)
- [Cluster network - Centre of Excellence of Biomass Schleswig-Holstein](#)
- [Design2Innovate](#)
- [Digitale Wirtschaft Schleswig-Holstein](#)
- [Food Cluster of Southern Denmark](#)
- [FURGY](#)
- [KNE Food Cluster Schleswig-Holstein](#)
- [KVCA](#)
- [Lean Energy Cluster](#)
- [Life Science Nord](#)
- [Logistik-Initiative Schleswig-Holstein \(LogI-SH\)](#)
- [Maritime Cluster Northern Germany](#)
- [Mechatronics Cluster Denmark](#)
- [Offshore Center Denmark](#)
- [Plast Center Denmark](#)
- [ROBIN](#)
- [RoboCluster](#)
- [Staalcentrum](#)
- [Welfare Tech Region](#)
- [Windcomm Schleswig-Holstein](#)

4. Activities

- Create a platform for information and exchange of knowledge about the clusters in the project.
- Identify good practice on how to promote collaboration and internationalization of clusters in border regions.
- Arrange networking and training activities for clusters facilitators on topics like financing models for clusters, open innovation and commercialization.
- Arrange a matching event for cluster companies and research facilities to engage in collaborative project development.
- Document the key findings from the project in a report by the end of the project.

4. Activities

4.A Collaboration Platform

The screenshot shows the InTra-Net website with the following content:

- Navigation:** Home, About the Project, News and Events, Participating Clusters, Contact.
- Logos:** InTra-Net logo, INTERREG4A logo, and European Union logo.
- Participating Clusters List:**
 - AluCluster
 - CEwind Center of Excellence WInd Energy
 - Cluster network - Centre of Excellence of Biomass Schleswig-Holstein
 - Design2Innovate
 - Digitale Wirtschaft Schleswig-Holstein
 - Food Cluster of Southern Denmark
 - FURGY
 - KNE Food Cluster Schleswig-Holstein
 - KVCA
 - Lean Energy Cluster
 - Life Science Nord
 - Logistik-Initiative Schleswig-Holstein (LogI-SH)
 - Maritime Cluster Northern Germany
 - Mechatronics Cluster Denmark
 - Offshore Center Denmark
 - Plast Center Denmark
 - ROBIN
 - RoboCluster
 - Staalcentrum
- Participating clusters section:**

Matchpoint – the place to find your new project partner

Here you can find information about participating clusters from the INTERREG 4A region.

Do you also want to tell others about your cluster? Then join the network and register your cluster [HERE](#).

By registering your cluster will be promoted on this website and has the option to be linked with potential project partners among the participating clusters.

Find the InTra-Net clusters here:

AluCluster

Name: AluCluster
Address: PO-Box 804
 Jernbanegade 27
 DK-6000 Kolding
Website: www.alucluster.com

Contact: Michael Nedergaard
 Managing Director
 E-mail: mn@alucluster.com
 Phone +45 2035 3255

Founded: 2001
Members: 75 members (Industrial members within the aluminium industry)
Industry: Aluminium
Focus Business Areas: All aspects of industrial use of aluminium.

CEwind Center of Excellence Wind Energy

Name: CEwind Center of Excellence Wind Energy
Address: Kanzleistrasse 91-93
 DE-24943 Flensburg
Website: www.cewind.de

Contact: Axel Wiese
 Managing Director
 E-mail: wiese@cewind.de
 Phone +49 461 805 1245

Founded: 2005 as a research initiative - 2009 as a legal entity
Members: Cooperative members: 7 universities, 1 bank, 1 school, 10 professors, 1 consultant, 1 adjacent cluster, 1 special interest group
 Cluster network: regional companies engaged in development and manufacturing of wind energy components and systems, developers of wind farms, wind energy specialists and service providers, regional business development organisations
Industry: Wind energy
Focus Business Areas: Cooperation of and services for universities, companies and networks in the area of wind energy systems, technology and economy.
Services:

- research & development joint projects

4.B Cross-border case studies

Aim: To identify and learn from similar cross-border cluster collaborations in Europe.

Recommendations:

1. Identify challenges and **opportunities** for the clusters in the border region.
2. Be aware that **lack of understanding** and absence of aligned expectations can hinder cross-border clustering.
3. Initiate a **labour mobility** programme targeted at all triple helix actors in the border region.
4. Make sure that **business development policies** and cluster policies on both sides of the Danish-German border are aligned.
5. The word “**border**” often has a meaning of exclusion and obstacles. A new name for the entire region is important and needed for future identification.

4.C Workshops and networking events

Aim: Training cluster managers from the region in important subjects for cross-border collaboration. Matching and networking.

17-18 January 2012...Workshop 1 and networking event

Focus on Open innovation, Facilitating innovation processes, Cluster mappings, Presentation pitches, Intercultural issues, Idea generation.

12-13 June 2012... Workshop 2 and networking event:

Focus on Business model creativity, Designing cluster initiatives, Experiences from IT Cluster in Switzerland, Available EU funding for cross-border projects.

14 September 2012... Workshop 3:

Focus on Strategic relationships in business models, Choosing partners, Relationship costs and benefits, Critical resources, Important activities.

5. Challenges and successes in our project

Challenges:

- Cultural differences across borders
- Structural and organisational differences
- Language barriers
- Perceived spatial distance

Successes:

- A new network between cluster actors on both sides of the border
- Three ongoing cross-border project ideas:
 - Offshore Wind Cost Competitiveness
 - Cross Border Health Care Development
 - Network for Cluster Managers in the border region
